Statements and Declarations

Funding This research was supported by the Sri Lanka Institute of Information Technology CDAP module.

Competing interests The authors declare that they have no competing interests.

Ethics approval Not applicable. This study did not involve human participants, human data collected through interaction, biological material, or animal subjects.

Consent to participate Not applicable. No human participants were recruited for this study.

Consent for publication Not applicable. The manuscript does not report personally collected participant data requiring publication consent.

Data availability The datasets generated and analysed during the current study are not publicly available due to copyright restrictions associated with cricket broadcast video sources. Derived annotations may be made available from the corresponding author on reasonable request.

Materials availability Not applicable.

Code availability The source code developed for this research is not publicly available at this stage but may be made available from the corresponding author on reasonable request.

Author Contributions

R.M.N.D. Rathnayake designed and implemented the proposed system, prepared the datasets, conducted experiments, analysed results, and drafted the manuscript. Anuradha Karunasena supervised the research, reviewed the methodology, and provided academic guidance. Adya Dissanayake co-supervised the research and reviewed the technical and research content.
